Video file description

DVD – copy of the initial DVD disk.

MKV – file in .mkv format with subtitles (English, German). There are at least two free multiplatform players that work with this format:

- VLC media player (https://www.videolan.org/vlc/)
- SMPlayer (https://www.smplayer.info/)

You can switch the subtitle language using the "Subtitles" menu item in these programs.

Online - watch a movie in your browser with English subtitles.

You can ask Vadim Annenkov (annenkov@yahoo.com) about technical problems with the movie, maybe I can help. Any comments and ideas for subtitle translations are welcome.
